1. Introduction

1.1. About ProPTT2

ProPTT2 is a video IP-PTT solution for video/voice PTT, real-time video sharing and also it is voice PTT compatible with two-way radio. Find out more information on ProPTT2 website.

ProPTT2 website: www.proptt2.com

1.2. ProPTT2 Smartphone Application

ProPTT2 provides iOS, Android application for IP-PTT service. Channel users can communicate with each other using video/voice PTT and IM. Users can also share their location information while sending PTT. ProPTT2 will be helpful for fast and easy communication in various fields.

1.3. Membership

ProPTT2 membership is divided into the different categories as listed below. Application's function is differ according to your membership.

1. App Service Free membership **FREE**

Public users who downloaded the app on Apple App Store or Google Play Store and signed up for free.

2. App Service Paid membership **PAID**

Public users who downloaded the app on Apple App Store or Google Play Store and purchased a pass for paid service.

3. Cloud Service Customer's Users **Cloud**

Users of the customer who purchased ProPTT2 Cloud Service. Cloud Service administrator provides the users' ID and an initial password.

4. Server Package Customer's Users **Server**

Users of the customer who purchased ProPTT2 Server Package. Server Package administrator provides the users' ID and an initial password.

* Icons indicates that the content applies only to that members.

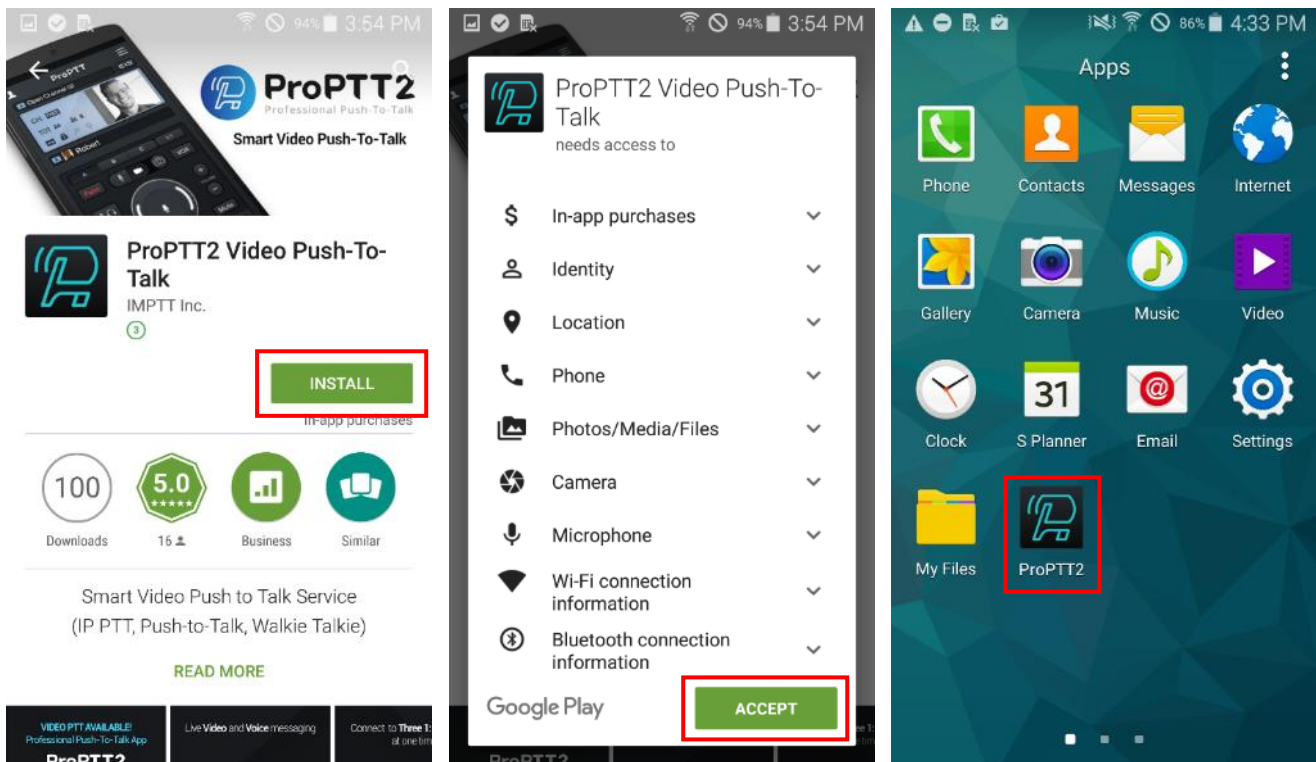

2. Installation

2.1. Install ProPTT2 Application on iPhone

1. Open App Store and search for ProPTT2.
2. Tap **GET**, then tap **INSTALL**.
3. If prompted, enter your password. You can also use Touch ID.
4. The app downloads to your device.
5. When the installation is complete, tap ProPTT2 icon to open it.

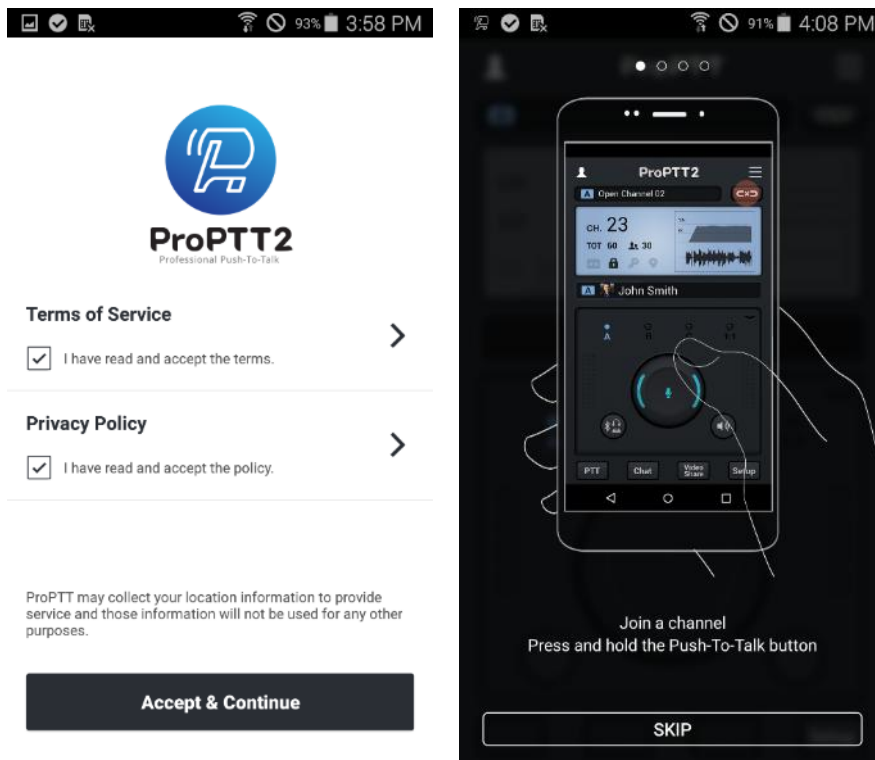

2.2. Install ProPTT2 Application on Android device

1. Open Google Play and search for ProPTT2.
2. Tap **INSTALL**
3. **ACCEPT** the agreement.
4. When the installation is complete, tap ProPTT2 icon to open it.

3. Start ProPTT2

3.1. Terms and Tutorials

1. The first time you open the app after you install, you see terms and conditions.
2. Check the both checkbox if you agree to accept the Terms of Service and Privacy Policy. Tap **Accept& Continue**.
3. Swipe pages and check tutorial guide.
4. Tap **SKIP** or **Start** to close tutorial

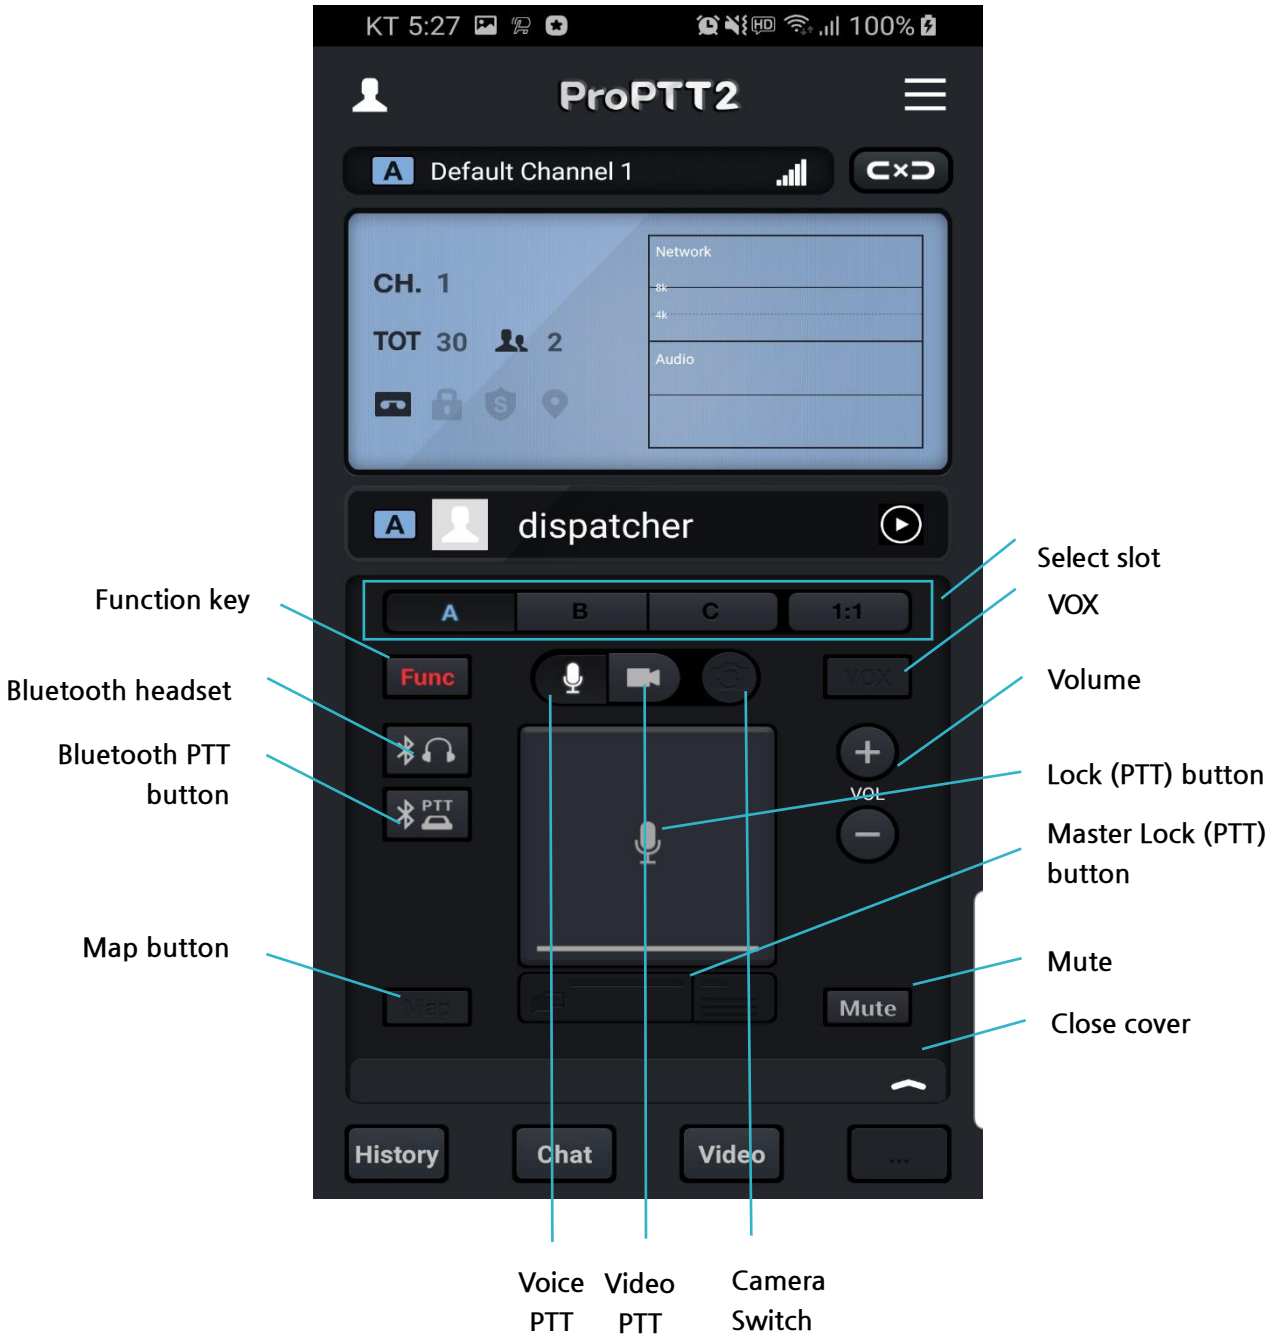

3.2. Basic UI

3.2.1. Cover Closed

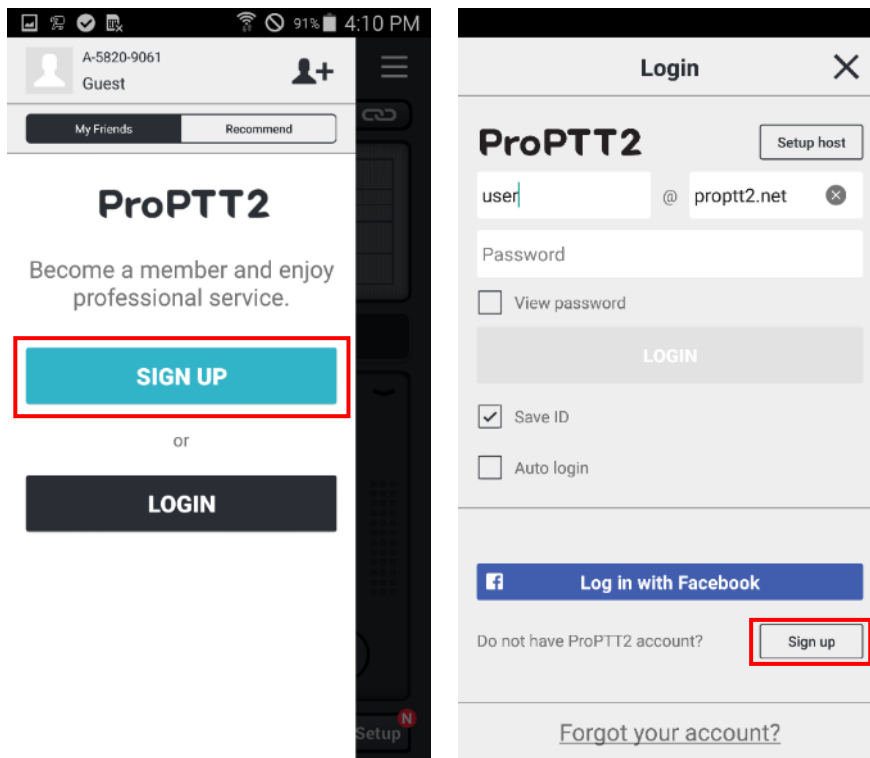

3.2.2. Cover Opened

※ The features of “Master Lock (PTT) button/Map button” will be applied when the server package/Cloud service are updated later on.

4. Sign Up

4.1. App Service Users FREE PAID

1. Tap **Sign Up** button on the right friend menu. If you are a previous user, sign up button is on the Login page.

2. Enter ID and tap **Check** for ID duplication.
3. Enter password and enter the same password below for confirmation.
(Password must be at least 8 characters long.)
4. Enter user name.
5. Enter a valid email address for contact.
6. Select a country.
7. Tap **Create Account** to complete the sign up process.

5. Login

5.1. App Service User **FREE** **PAID**

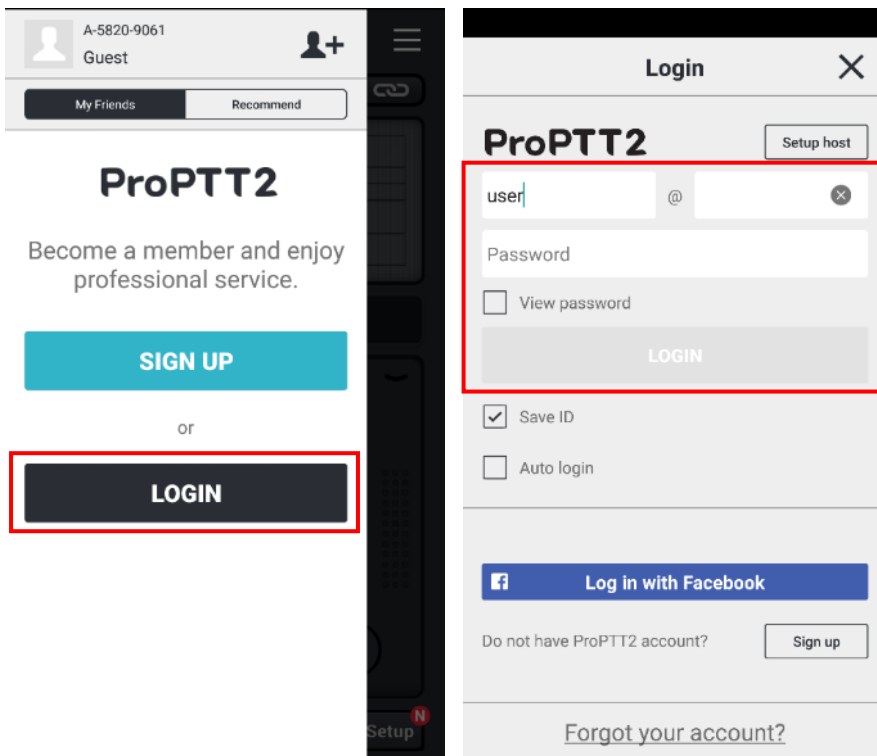

5.1.1. ID Login

1. Tap **Login**.
2. Enter your ID and password and tap **Login**.

5.1.2. Facebook Login

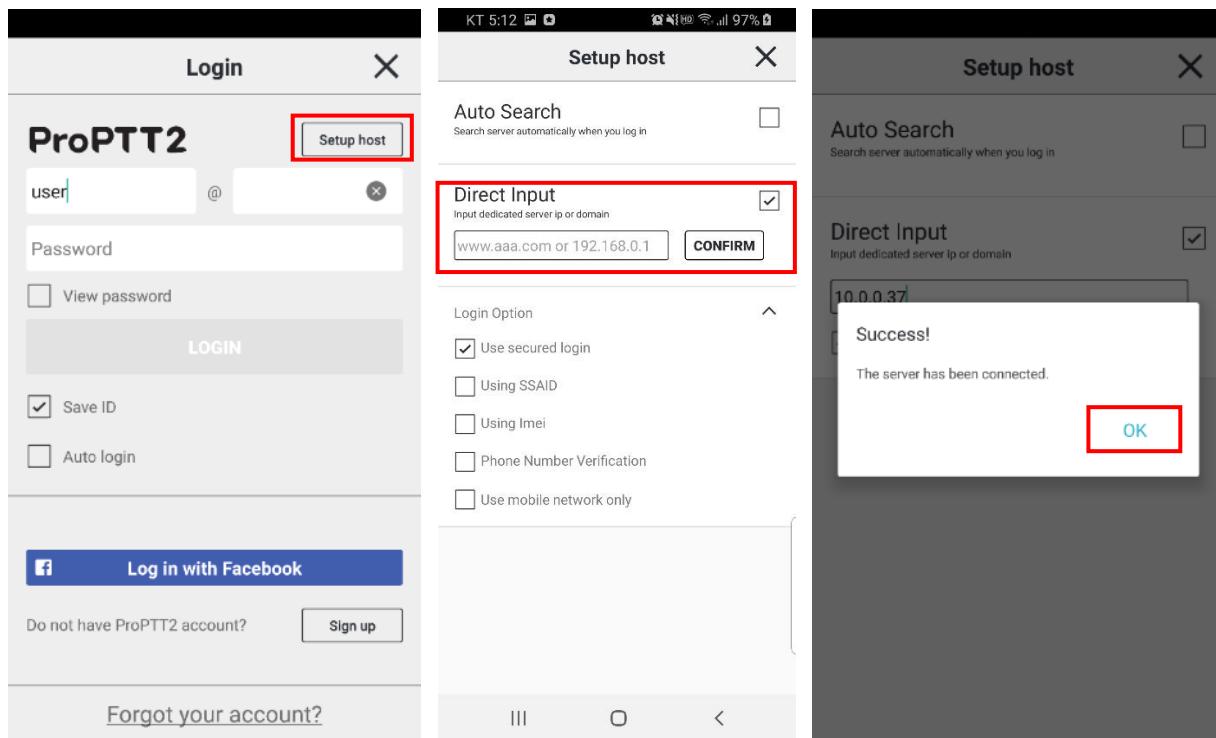

1. Tap **Log in with Facebook**.
2. Log in to your Facebook account.
3. Tap **OK**.
4. It is not supported from 6.x version.

5.2. Cloud Service User Cloud

1. Tap **Login**.
2. Enter your ID and password and tap **Login**.
(If you do not know your ID or initial password, ask you Cloud service administrator.)

5.3. Server Package User **Server**

1. Tap **Login**.
2. Tap **Server host**.
3. Select **Direct Input**.
4. Enter server IP or domain and tap **TEST**.
5. If connection succeeds, go back to login page and input ID and password and tap **Login**.
(If you don't know your ID or initial password, ask you Server service administrator.)

5.4. Login Option

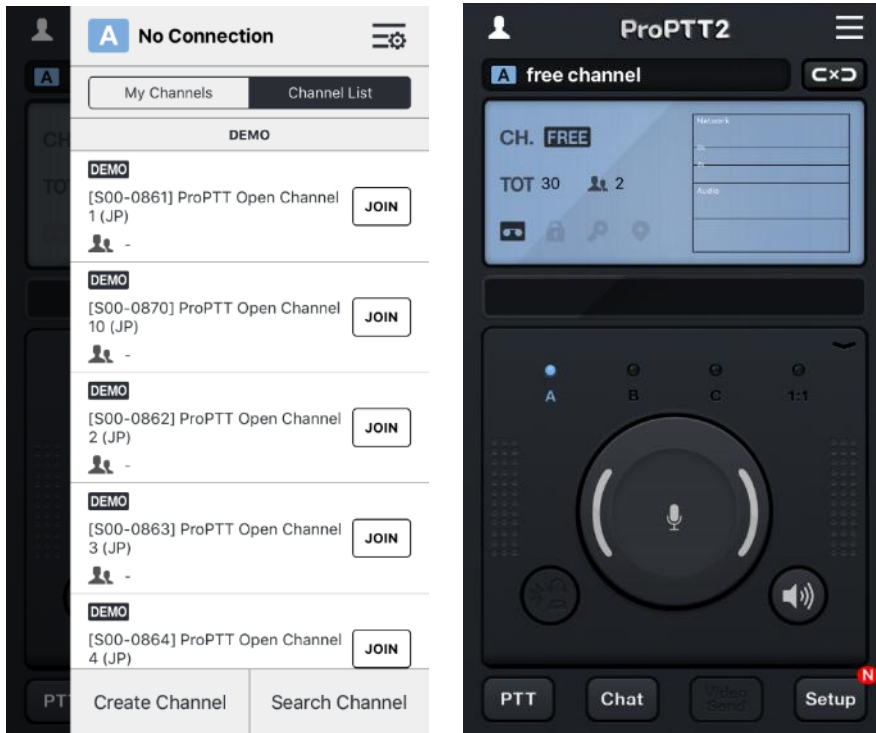

You can check login options in [Setup host] menu when you log in to ProPTT2.

1. Use secured login
2. Use SSAID: If you check this option, you can use the device with SSAID registered by administrator when you log in with a specific account. (Android only)
3. Using IMEI: if you check this option, allows only administrator-registered device with IMEI to be used when logging into a specific account. (Android only, it is not supported from Android 10)
4. Phone Number Verification: if you check this option, allows only administrator-registered device with phone number to be used when logging into a specific account. (Android only)
5. Use mobile network only: if you check this option, it works only with mobile network and not available on Wi-Fi network environment. (Android only)
6. Use Device login: You can log in through SSAID/IMEI without entering an account. However, login is possible only if the permission is set on the server. (Android only)

6. Join a Channel

6.1. Join a Channel

1. Tap  to open channel menu.
2. Choose a channel a Tap **Join** to connect.

6.2. Disconnect a channel

1. When the channel is connecting, tap  to disconnect.
2. Tap  to connect the channel again.

6.3. Current channel information

-  Current channel number
-  Timeout value
-  Current joined member count
-  Current channel will record in client-side
-  Sending PTT is restricted in current channel
-  Current channel is crypted
-  Member's location will be tracked.

7. Push-To-Talk(PTT)

7.1. Send Voice PTT

Connecting to a channel, press and hold Lock button and speak. Your voice is sending to users connecting the same channel. You can check PTT status according to the color of Lock button.

[Lock button Type]

PTT Stand by

PTT transmitting

PTT receiving

PTT Requesting

interrupting

disconnected

7.2. Send Video PTT

1. Open cover and tap .
2. Select a camera with camera switch button.

F: Front (Face, Self) Camera

B: Back (Rear) Camera

3. Press and hold Lock button and video and audio is sending to others.

7.3. PTT using Bluetooth Button
