Voice push-to-talk and text chat during the Video Sharing

Supports external UVC camera connection for useful video sharing

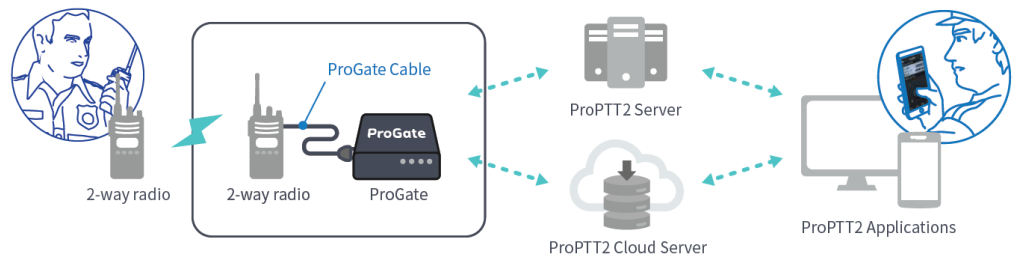

With RoIP gateway device(ProGate)

Voice PTT compatible with two-way radios

ProPTT2 | Smart Video Push-To-Talk

ProGate is the RoIP(Radio over IP) gateway device that provides you voice PTT communication environment between IP based Push-To-Talk service and two-way radios(FRS, UHF, VHF, TRS).

For useful push-to-talk,

Support various platforms and PTT devices

ProPTT2 | Smart Video Push-To-Talk

Support video PTT applications of various platforms

- Smartphone App(iOS, Android)
- Embedded App(Android)
- Wearable App
- PC Client(Windows)

Has acquired GS certification(The first grade)

Support PTT dedicated devices

ProPTT2 supports various screen resolutions of PTT devices and also supports to use PTT button when the app is in background or the device is screen-off.

You can send/receive SOS messages each other by using SOS hard key.

※ You can connect and use the functions of ProPTT2 app to button of PTT phone.

Support various Bluetooth/wired accessories

Bluetooth PTT button

Bluetooth Speaker Mic with PTT button

Wired PTT headset

World first video push-to-talk service

Major features and techniques of ProPTT2

ProPTT2 | Smart Video Push-To-Talk

Patent registered IP-based video push-to-talk

- Video-based PTT service, Support full real-time push-to-talk
- World first, support bi-directional PTT in 1:N channel
- World first, support dual audio mode (VoIP of Full-Duplex/MP3 of Half-Duplex)
- High quality video/voice push-to-talk(Opus, H.265, Codec2)
- AI based Noise Reduction

Professional video push-to-talk

- Video PTT, Real-time video sharing PTT
- Text chat/Transfer image/file, User's location sharing
- Interrupting PTT, Voice PTT batch transmission by admin, SOS/Alert message
- Multi channel connecting at same time, PTT history

Support user's convenience for push-to-talk

- Optimized PTT features and UI/UX for smart devices
 - Set external button as PTT features, Support various screen resolutions and using PTT button when screen is off
- Support various mobile/Bluetooth devices
 - PTT devices, Smart Watch, PTT Accessory, USB camera

Compatible with other's system

- Voice PTT compatible with two-way radios(RoIP gateway integration)
- Voice PTT compatible with SIP Phone(SIP gateway integration)
- Sharing video of IP-CCTV camera(RTSP integration)

Customizable PTT products for B2B customer

- On-premise Server Package(S/W), Sign up for cloud service(ASP)
- Support PTT system's bulk service with scalability for Many users
- Use video PTT app per user and administrator(iOS/Android, Windows)
- Real-time management for user and PTT channel's information

Strong security for video PTT service

- Support strong data encryption(OTP, SSL/TLS, AES/ARIA, E2EE)
- Support customer's encryption module
- Support SSAID/IMEI/Phone number authentication of smart devices
- Use PTT app in mobile network(3G, LTE) only

Support various customizing tool

- ProPTT2 SDK for development of video PTT app
- ProPTT2 OpenAPI, Plug-in for integration with B2B customer's system
- ProGate Firmware for production of RoIP gateway device
- Support changing B2B customer's logo image

Video PTT for global customer

- Global server farm for Cloud Service(Asia, North America, Europe)
- Download ProPTT2 app from App Store, Play Store and ProPTT2 website(www.proptt2.com)
- Multi-language for global service(Up to 204 countries, 90 languages)

IP-based video push-to-talk solution

ProPTT2's Products

ProPTT2 | Smart Video Push-To-Talk

ProPTT2 Server Package(S/W) On-premise Server Software

With ProPTT2 Server Package, It's possible to build customer's own video push-to-talk system.

ProPTT2 Cloud Service Sign up for video PTT service(ASP)

Without building and managing a new system, you can use video PTT service by monthly plan.

ProPTT2 Applications(S/W) iOS/Android App, Wearable App, PC Client

Customer's users for Server Package and Cloud Service can download and use ProPTT2 app on App Store, Play Store.

ProGate(H/W) RoIP(Radio over IP) Gateway device

ProGate provides you voice PTT compatible between IP-based PTT service and two-way radios (FRS,UHF,VHF,TRS).

ProPTT2 SDK(S/W) iOS/Android/Windows

With ProPTT2 SDK, for customer's needs, you can develop new video PTT app or add video/voice PTT function on your customer's application.

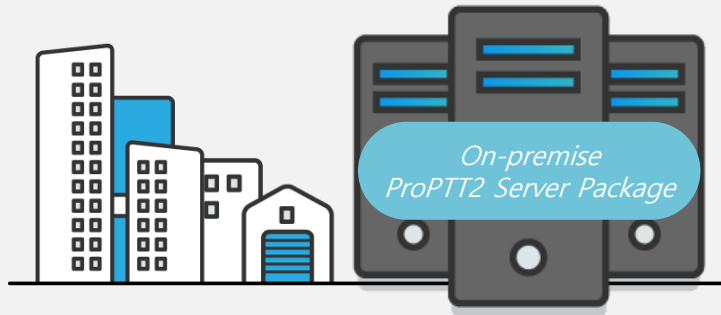

ProPTT2 App Service For individual users(B2C)

Users can download ProPTT2 app for free and use paid app service(In-App purchase).

With ProPTT2's products implementation of video PTT service for you

2. Sign up for video PTT Service(ASP) ProPTT2 Cloud Service

ProPTT2 | Smart Video Push-To-Talk

ProPTT2 Cloud Service System
Global Server Farm : Asia, North America, Europe

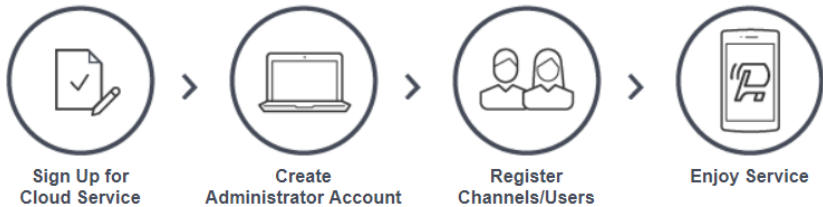

Who wants to save time and use video PTT service immediately

who wants to use affordable service without worrying about building & managing new system

Customer : by monthly plan, ProPTT2 App for free / ProGate not included

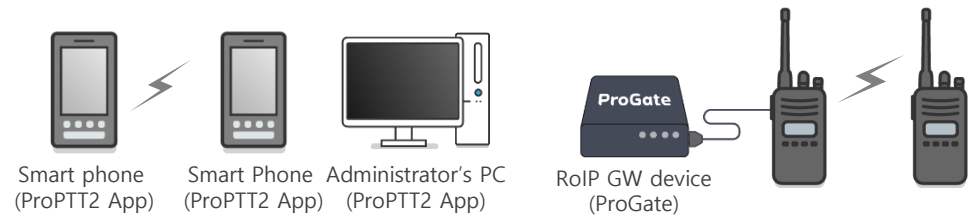

[IMPTT Inc.]

Operation and management of Cloud-based video PTT system

[Customer]

Without building and managing a new system, you can use video PTT service by monthly plan.

3-1. Professional video push-to-talk application

ProPTT2 Smartphone App | iOS, Android

ProPTT2 | Smart Video Push-To-Talk

Support OS : iOS 8.1 or above, Android 5.0 or above
 App Download : App Store/Play Store, ProPTT2 homepage

World first, Dual audio mode(MP3/VoIP)

- Support both VoIP mode of Full-Duplex and MP3 mode of Half-Duplex
- Support minimum bandwidth(2.4kbps/VBR)
- Support noise reduction and low-path filter during audio input/output for sound quality
- ※ ProPTT2 Android/Embedded app only

Optimized PTT features for smart devices

- Using PTT button when screen is off
- Set device's external button/keypad as PTT features
- VOX PTT and chat with voice recognition
- PTT widget and floating PTT button on screen
- Support wearable app(Apple Watch / Android wear)

Professional video push-to-talk

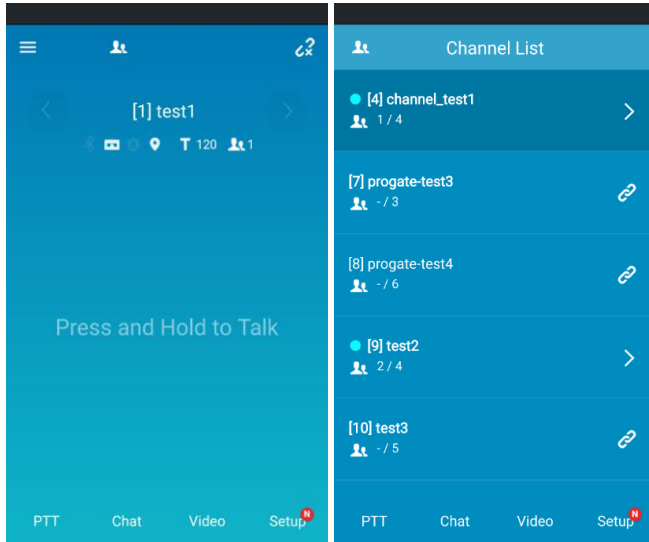

- Interrupting PTT
- SOS/Alert message
- Real-time channel synchronization
- SSAID/IMEI authentication of smart devices
- Use PTT app in mobile network(3G,LTE) only

3-2.Simple PTT application, Support multi screen resolution

ProPTT2 Embedded App | Android

ProPTT2 | Smart Video Push-To-Talk

Screen of ProPTT2 Embedded App

Support OS : Android 5 or above
App download : ProPTT2 homepage

Example of ProPTT2 Embedded App

PTT dedicated device

Android Tablet for auto

Android-based Watch

Fit to any screen

Support optimized app's UI for various screen resolution of smart devices
(Wearable, PTT devices with keypad, Android Tablet)

Simple user interface for video PTT

Removed the visible "PTT button" of app and simplified App UI for easy and convenient

Handy PTT with screen touch

Just push the main screen to transmit PTT and don't worry about pressing the wrong button in a small size screen

Features of ProPTT2 Wearable App

3-5. Administrator's video push-to-talk program

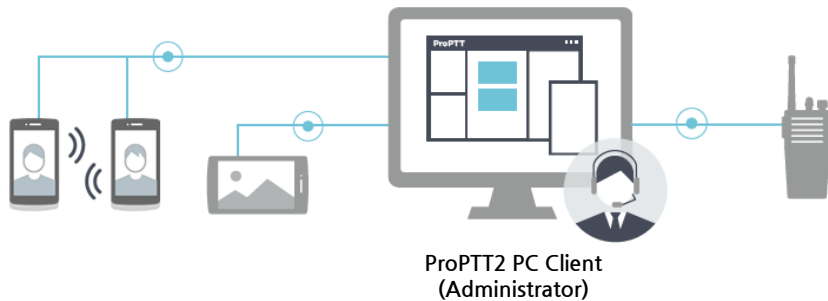

ProPTT2 PC Client | Windows

ProPTT2 | Smart Video Push-To-Talk

Support OS : Windows 10.0 or above, Edge
 App download : ProPTT2 homepage

For Administrator, ProPTT2 video PTT program(PC Client)

- Connect up to 64 PTT channels at same time
 - 1:1, 1:N Video/Voice PTT, Text chat, Transfer image/file
 - View user's PTT/chat history per PTT channel
- Play up to 16 PTT channels' real-time videos from users
 - Smartphone video sharing, PC screen sharing, CCTV video sharing
- **Voice PTT batch transmission/Send alert message by Administrator after selected several channels**
- **Interrupting PTT by Administrator**
- **Support user's location monitoring and tracking**

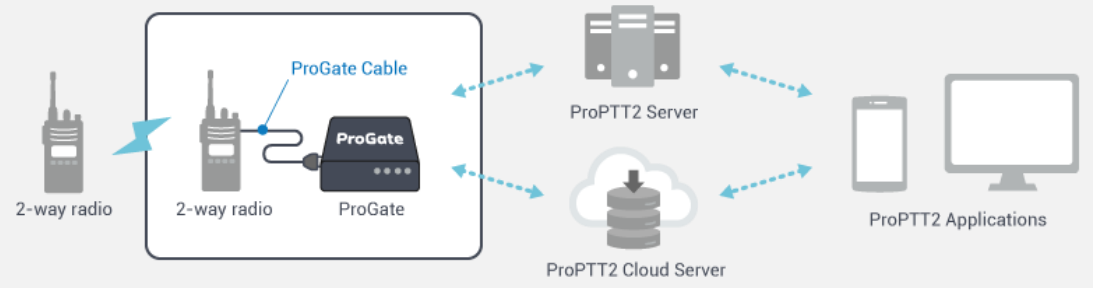

4. Compatible voice PTT with two-way radios ProGate(RoIP Gateway device)

ProPTT2 | Smart Video Push-To-Talk

ProGate/ Radio to Smartphone

ProGate provide voice PTT environment between smartphone/PC with ProPTT2 applications and two-way radio.

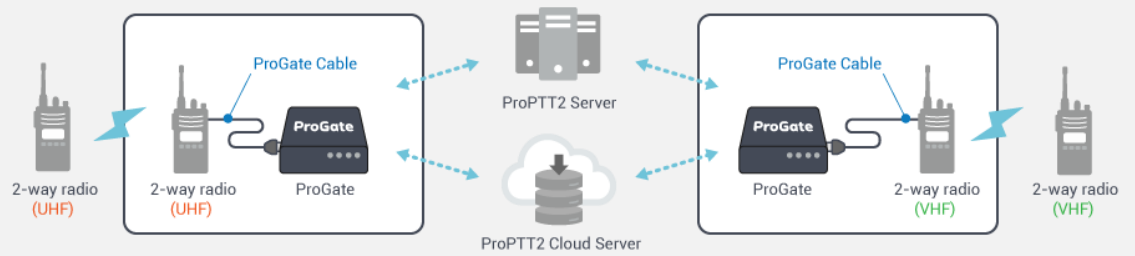

Support voice PTT compatible with two-way radio (FRS,UHF,VHF,TRS) and smartphone app/PC client

(You can apply ProGate to to ProPTT2 server package and ProPTT2 Cloud service.)

- Use multiple radio channels as a single unified PTT channel (Multi-channel Bridge)
- Prevent PTT lock duplicates in multiple ProGate installation environment
- Support "Admin Web" for managing ProGate's network/account/PTT channel settings

ProGate/ Multi-channel Bridge

You can use multiple radio channels as a single unified channel by integrating several ProGate, which connected to each radio channels, with ProPTT2 Server.

5. Develop customer's own video PTT app

ProPTT2 SDK | Software Development Kit

ProPTT2 | Smart Video Push-To-Talk

You can download ProPTT2 SDK on ProPTT2 developer site(dev.proptt2.com).

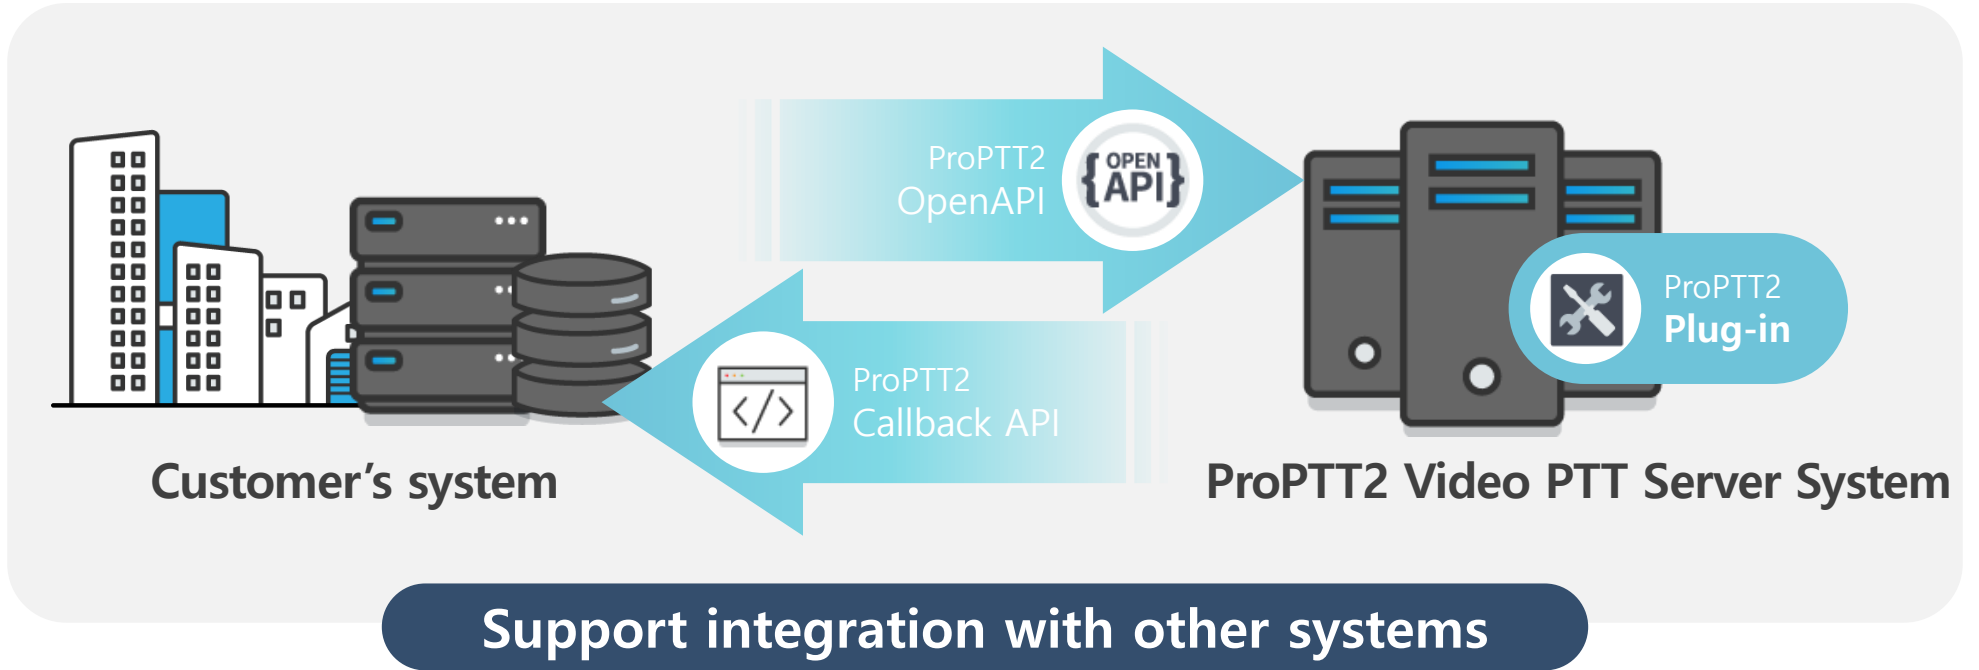

[ProPTT2 provides iOS/Android/Windows SDK for free.](#)

With ProPTT2 SDK, for customer's needs, you can develop new video PTT app or add video/voice PTT function on your customer's application.

6. Integration with customer's system

ProPTT2 OpenAPI

ProPTT2 | Smart Video Push-To-Talk

ProPTT2 OpenAPI, Callback API, Plug-in

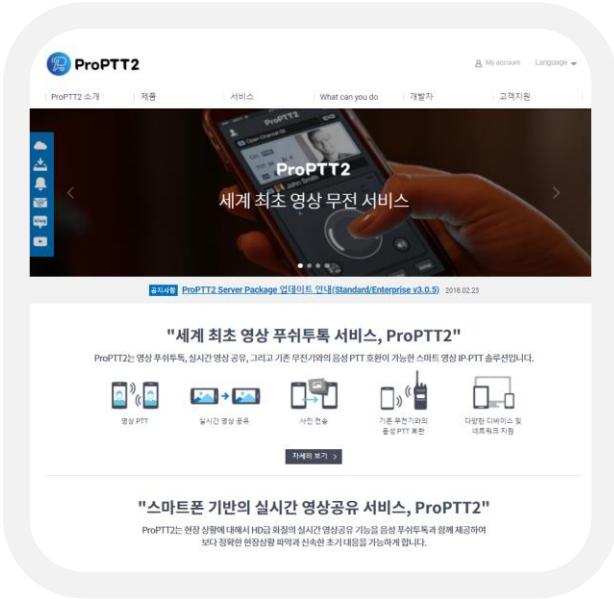

SIP gateway integration : support voice PTT compatible with SIP Phone

RTSP integration : support sharing real-time/recorded videos of IP-CCTV camera and VMS
